

Jerrod Tanner

Professional Summary

Email: jerrod@jerrodtanner.com
GitLab: <https://gitlab.com/JerrodJTanner>

Software Developer and aspiring Back-End Engineer with three years of experience dedicated to learning Python scripting, code maintenance, version control, database architecture, web development, Excel and VBA solutions, workflow management, and agile workflow. I am seeking challenging projects to collaborate with seasoned engineers, fostering skill enhancement and continual learning.

Technical Skills:

- ❖ Git
- ❖ Virtual Machines
- ❖ Epic Reporting
- ❖ Python
- ❖ Go
- ❖ Java
- ❖ Bash
- ❖ Docker
- ❖ HTML

Soft Skills:

- ❖ Project Management
 - Communicating blockers
 - Creating plans
 - Change of course flexibility
 - Teammate involvement/delegation
- ❖ Promoting Community and Friendship
- ❖ Elegant Ticket Documentation
- ❖ Automating Tasks Appropriately

Work Experience:

Clinical Systems Analyst-Associate

Broward Health
Summer 2024 - Present

- Epic Certified in 60 Days Without Prior Clinical Experience
- Radiant and Lumens Scheduling Templates
 - Δ Worked with Operations at each facility to coordinate 300+ appropriate schedule setups to allow basic scheduling upon going live with Epic
 - Δ Found jarring build issues when lightly auditing the currently created schedules
- Trained Radiology Nurses and Techs at All Four County Sites
 - Δ Acquired experience working directly with clinical staff in a professional setting
- Script for Cerner -> EPIC Order Crosswalk
 - Δ Built custom software to automate order crosswalk creation
- Leads Radiant Reporting for Operations and General Analytics
 - Δ Facilitated communication between Operations, The Cogito team, and our TS
 - Δ Assisted in tailoring reports to improve efficiency
- Tutored and Trained a New Analyst
 - Δ Effectively managed time and utilized teaching skills to increase team productivity
- Audited and Rebuilt ½ of Radiant Procedures' Charges
 - Δ Worked with Revenue Integrity, Hospital Billing, and Operations
 - Δ Debugged various errors within our charge capture workflow- this included various routing issues between Radiant, Cupid, OpTime and Lumens
- Has Pushed 40 Tickets to Production in 6 Months

Data Architect

Keiser University
Summer 2021 - Summer 2024

- Utilized Python to create a reconciliation tool saving Human Resources 20 hours per week reviewing insurance benefits
- Developed Python tooling to automate payment type labeling, saving Accounts Payable 10 hours per week and assisting with auditing
- Wrote a Python based tool to detect errors in 401k matching leading to \$12k per month in savings
- Developed tooling to automate invoice generation to assist in collecting rent
- Developed a Django based tool to easily manage textbook inventory with a web ui
- Developed an app to parse large log volumes, aiding in production debugging

Intern

Lennar
Summer 2020

Volunteering

Urban League

Summer 2021

- Teaching programming to elementary school students

Tutoring

2017-2025

- Tutoring friends, neighbors, and coworkers in basic math, coding, and Epic

Interests

Linux

- Arch Linux installations
- VFIO passthrough
- Virtual Machines
- User Automation

Other

- Building Computers and Drones
- Weightlifting
- Competitive Gaming

Education

Elon University-Graduated in 2021

- Bachelor's in Computer Science
- Minor in Economics
